

# NAC&ZAC

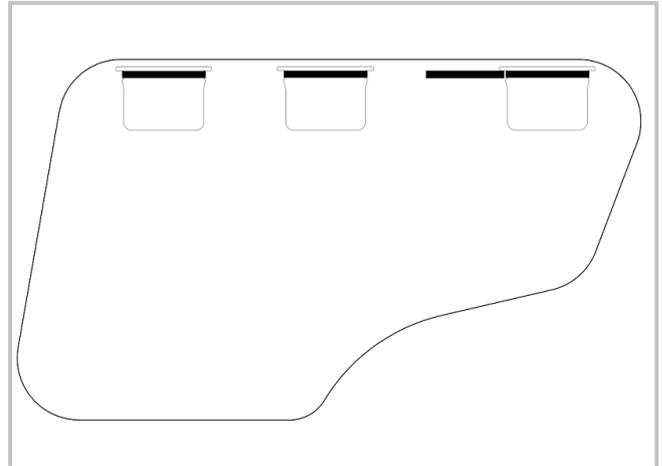

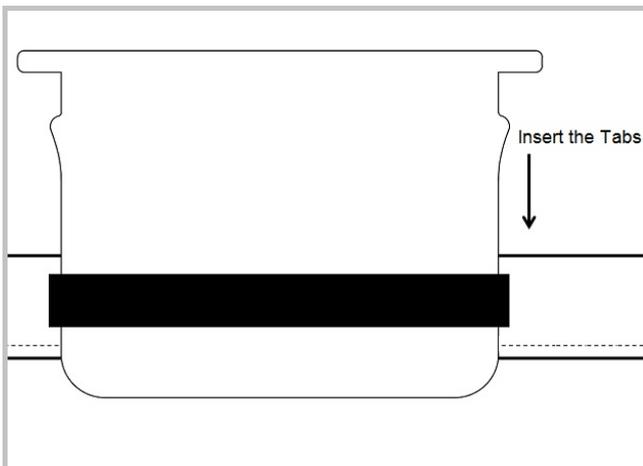

## Car Door Cover Care and Installation Guide

### Installation Instruction:

The NAC&ZAC Car Door Cover package contains six 4-inch long velcro tapes and six removable tabs to attach the top of the cover, and two 1.5-inch long Velcro tapes to attach the bottom of the cover. There are 2 options to install the cover, either use the tabs or the Velcro tapes, you can choose the method that best fit your car

**Notice:** The windows can be rolled down after the covers are installed, but please make sure the edge of the glass doesn't go lower than the covers in order not to affect the covers.

### Installation Option 1: Use the tabs.

**Step 1:** Insert the tabs into the strips on the top of the cover, push the tabs until the 'ears' pass through the strips. The 'ears' can hold the tab in place, bend the tab slightly to get the 'ears' pass though the strips

There are 2 strips on the narrow side of the cover, choose the strip that best fit your car door size.

**Step 2:** Insert the tabs between the window and the car door panel.

**Step 3:** Attach the 1.5-inch long tape to the velcro at the bottom of the cover, peel the tape and stick to the interior car door.

## Installation Option 2: Use the Velcro tapes.

**Step 1:** Clean and dry the interior car door, do not leave water or oil on the surface.

**Step 2:** Stick the 4-inch long tapes firmly next to the window, and stick the 1.5-inch Velcro tape to the car door. Wait for at least 24 hours before attaching the cover.

The 3M Velcro strips are easy to remove, and use the 3M Adhesive Cleaner to easily remove the marks.

The Velcro strips are not reusable once removed. You can use 3M Command picture hanging strips or any sticky Velcro strips as the replacement.

**Step 3:** Attach the cover to the car door.
