Deluxe Hammock Seat Cover Care and Installation Guide

Care Instructions:

- Machine wash gentle.
- Wash separately, dark color.
- Do not bleach.
- Line dry.
- Do not tumble dry.
- Do not Iron.
- Do not dry clean.

Installation:

		
Lay the cover in place and push the seat anchors on the underside of the cover into the crevice between the seat back and the bottom cushion.	Loop the straps around the headrests and adjust the length of the strips to the best fit. And loop the elastic straps around the corner of the seat back.	There are 2 elastic straps on the underside of the cover, slip the straps into the space between the seat bottom and the floor.
		
For vehicles with seats that are elevated above the floor, there are also two long elastic straps on the underside of cover, and there is velcro on the end of each strap.	Connect the straps with the velcro under the seat cushion. The straps can help hold the cover in place. Please note these straps are optional and might not work for seat flush with the vehicle floor.	There is one strap with 'hook' velco on each side flap. For elevated seats, attach the strap to the underside of the seat cushion. For seat flush with the vehicle floor, attach the velcro to the seat base, this can help hold the side flaps.
